

Product Specification Sheet

2.5kg Fire Extinguisher Vehicle Bracket – Heavy Duty

Product Description:

This heavy-duty vehicle bracket is engineered for secure mounting of 2.5kg fire extinguishers in high-vibration environments. Constructed from robust powder-coated steel, it ensures durability and reliability in fleet, industrial, or off-road vehicles. The bracket is designed for quick access while preventing displacement during transport.

Specifications:

- Compatible with: 2.5kg DCP fire extinguishers (Safequip Brand)
- Material: Powder-coated mild steel
- Finish: Rust-resistant black powder coating
- Mounting: Pre-drilled holes for secure bolt-on installation
- Retention System: Steel locking strap with quick-release catch
- Bracket Design: Cradle or wraparound (model dependent)
- Weight: Approx. 1.2kg
- Dimensions: 210mm (H) x 160mm (W) x 100mm (D)
- Application: Heavy-duty/off-road vehicle installation

Applications:

- Fleet and commercial vehicles
- Trucks and bakkies
- Agricultural equipment
- Construction and mining vehicles
- Marine and off-road installations

Features and Benefits:

- Reinforced steel build for rugged conditions
- Lockable strap for extinguisher security
- Corrosion-resistant coating for long-term durability
- Compact design fits various vehicle layouts
- Quick release mechanism for emergency access

Packaging:

- Includes: 1 x Heavy-Duty Bracket for 2.5kg extinguisher
- Packaging Dimensions: Approx. 220mm x 170mm x 110mm
- Weight (packaged): ±1.4kg
